

# Omexom increase the market positioning – entering the Nordics

Infratek Group (Norway, Sweden and Finland) and Eitech Engineering will from January 21st, be a part of Omexom, VINCI Energies brand and network dedicated to energy transition in the entire value chain.

– The Nordics is an important market to us, it is in front regarding digitization within societies and renewable energies. Omexom entering the Nordics will contribute positively to strengthening our position as a major player in the European energy market services" says Julio de Almeida, Deputy Managing Director, VINCI Energies Europe.

VINCI Energies, the VINCI subsidiary specializing in energy, and information and communication technology, acquired both Infratek Group and Eitech just over a year ago. With these acquisitions, VINCI Energies continued to extend and consolidate its operations in Northern Europe.

– Turning Infratek Group and Eitech Engineering into Omexom is a natural step two. Now approx. 1,500 dedicated employees will be operating within Omexom business lines power, transmission, substations, distribution and territories. In Sweden will Omexom also operate within the business line railway, in Norway is Critical Power supply business line as well", explains Julio de Almeida.

Omexom is a global brand consisting business in 32 countries with a revenue above 3.2 billion Euros (2017). It is a network driven player where access to competence and reference projects is shared across departments, countries and continents.

– Omexom in combination with Infratek and Eitech Engineering's competence, history, skilled and dedicated employees we will be able to be an attractive partner to customers on all levels within the Nordics. As a strong international network Omexom is a great opportunity for the employee's careers and knowledge", says Julio de Almeida.

## About Omexom

With today's global energy sector undergoing constant change, Omexom works with its clients to deliver on the promise of the energy transition. Omexom's solution targets those who produce, transform and transport electricity, including local authorities. Omexom thus helps energy producers, grid operators and territories fulfill their missions whilst simultaneously navigating the evolving landscape. Omexom's expertise in the field of electrical grids allows us to anticipate the impact of renewable energies. We then work to develop storage solutions, make more sustainable infrastructures and meet new consumption trends.

As a system integrator, we assess individual needs of every customer, before selecting the best solution specifically for them. Omexom remains totally independent when it comes to integrating technological options.

Located in 32 countries on five continents, from rural to major urban areas, Omexom helps promote access to electricity, ensure security of supply and develop sustainable energy.

2017: €3.2 Billion in Turnover // 18,000 employees // 400 business units

32 Countries

### About VINCI Energies

Connection, performance, energy efficiency, data. In a constantly changing world, VINCI Energies is picking up the pace of rolling out new technologies to make two major changes a reality: the digital transformation and energy transition. With its strong local presence and agile organisational structure, VINCI Energies, through its business units, is making energy, transport and communication infrastructure, as well as manufacturing plants and buildings, more reliable, safer and more efficient day by day.

2017: €10.8 billion (revenue) // 69,400 employees // 1,600 business units // 53 countries
